CHILLY'S

Our mission is to accelerate the adoption and everyday use of reusable products. We do this through creating products for an active urban lifestyle, with the perfect balance of distinctive style and unrivalled performance.

Founded in 2010, Chilly's was originally created to help people have cold water on-the-go, without having to buy single-use plastic water bottles. The result was the Chilly's bottle: a modern and stylish product designed to be convenient, high performance and eco-friendly.

The range has since expanded to include a wider selection of reusable products, with many more exciting products in development. We are working towards a world where reusables become the norm.
